## SKILLS

- **Languages:** C++, Basic Java, C, Python
- **Frameworks:** HTML and CSS
- **Tools/Platforms:** AWS, Docker, Vs code, Git and Cisco Packet Tracer
- **Technical Skill:** Data Structures and Algorithms (DSA), Object Oriented Programming (OOP)
- **Soft Skills:** Resilience Mindset, Adaptability and Network Building

## PROJECTS

### Library Tracking Management [Link](#)

August 2025 – September 2025

- Built a menu-driven Java application that allows users to add, borrow, return, and display books.
- Applied Object-Oriented Principles (OOP) encapsulation, classes, and method to organize code effectively.
- Utilized Scanner-based input and switch-case logic to handle interactive user operation
- Managed book data using dynamic collections and ensured validation for borrow/return operations.

### Car Rental Services [Link](#)

February 2024 – March 2024

- Developed a responsive Car Rental Service website using HTML, CSS, and JavaScript with clean UI and mobile-friendly layouts.
- Implemented multi-page navigation including Home, Login, Signup, and Car Listings pages using structured folder-based architecture.
- Integrated user authentication UI (Login & Signup pages) with form validation using JavaScript.
- Added a dynamic car listing section, enabling users to view multiple car models with details and booking buttons.
- Optimized website structure by separating HTML, CSS, and JS files for clean maintainability and scalability.
- Used modern web development practices such as Flexbox, responsive grids, and mobile-first design.

## TRAINING

### Data Structure and Algorithm using Java Programming | Cipher Schools [Link](#)

July 2025

- Completed an intensive 120+ hour Data Structures & Algorithms program emphasizing hands-on problem solving with arrays, linked lists, stacks, queues, trees, graphs, heaps, hashing, and recursion.
- Implemented optimized algorithms for searching, sorting, dynamic programming, graph traversal, and string manipulation while applying time- and space-complexity analysis (Big-O notation).
- Gained practical experience with end-to-end coding workflows, including version control, debugging strategies, and competitive-programming-style problem solving — enabling independent development of efficient algorithmic solutions from scratch.

## CERTIFICATES

- Computational Theory: Language Principle & Finite Automata Theory | Infosys [Link](#)
- ChatGPT-4 Prompt Engineering: ChatGPT, Generative AI & LLM | Infosys [Link](#)
- Data Structures and Algorithms Using Java Programming | Cipher Schools [Link](#)

August 2025

August 2025

July 2025

## EXTRA- CURRICULAR-ACTIVITIES

- Won a consolation prize in One India 2025 representing Sikkim [Link](#)
- Participated in the “Code-a-haunt” 24 hours Hackathon [Link](#)

April 2025

March 2024

## EDUCATION

- **Lovely Professional University**  
*Bachelor of Technology - Computer Science and Engineering; CGPA: 6.91*

Punjab, India  
Since August 2023

- **St Roberts H.S School**  
*Intermediate; Percentage: 64*

Darjeeling, West Bengal  
April 2020 - March 2022

- **St Roberts H.S School**  
*Matriculation; Percentage: 63*

Darjeeling, West Bengal  
February 2019 - March 2020
